

# CLOZE EVALUATION QUESTIONS

## FINDING YOUR WAY: USING MAPS AND GLOBES

NAME \_\_\_\_\_

DIRECTIONS: Select the answer from the four choices given by circling the correct letter.

1. Maps and globes help us to find places in our town, state, country, and even our world. A \_\_\_ is a drawing or plan which gives information about and location of some part of the world.  
1. (A) globe  
(B) map  
(C) atlas  
(D) legend
2. Although maps are accurate they do not look like our earth. A \_\_\_ is a more exact model of the earth showing the continents and oceans. The sizes as well as the locations of countries can be seen easily using this model.  
2. (A) globe  
(B) map  
(C) sphere  
(D) political map
3. There are different types of maps which give us different kinds of information. In order to travel from one town or state to another, a \_\_\_ would be the best map to use. This type of map is important when you travel by car or truck throughout the states.  
3. (A) weather map  
(B) political map  
(C) road map  
(D) geographic map
4. It is important to know where a city, state, or country begins and ends. A \_\_\_ shows the boundary lines between these places. This type of map clearly shows the sizes and locations of our 50 states.  
4. (A) political map  
(B) weather map  
(C) physical map  
(D) road map
5. Other maps show the locations and types of land forms on the earth. A \_\_\_ indicates mountains, valleys, and areas of water in a specific place. This kind of map can depict a small area or the entire earth.  
5. (A) political map  
(B) physical map  
(C) geo-political map  
(D) land map
6. Maps give us specific information about an area. A map \_\_\_ stands for an object or place that is actually on the earth. For example, a line may stand for a road, a dot for a city, and the color green for a forest.  
6. (A) legend  
(B) bar scale  
(C) symbol  
(D) origin
7. To find out what the map symbols mean look at the bottom of the map. There you will find the map \_\_\_ which lists the symbols used and what they mean. This part of the map is important since it helps you to use the map effectively.  
7. (A) scale  
(B) symbol  
(C) index  
(D) legend
8. In order for us to locate exact places on the earth a system of lines was developed. Those lines that run east and west around the earth are known as lines of \_\_\_. One of these lines is the equator which divides the earth into northern and southern halves.  
8. (A) latitude  
(B) longitude  
(C) meridians  
(D) parallels
9. We need another set of lines to form a grid which will then allow us to locate places exactly. These imaginary lines called \_\_\_ lines run north and south around the earth. The prime meridian is one such line, and divides the earth into eastern and western halves.  
9. (A) latitude  
(B) longitude  
(C) parallels  
(D) meridians
10. We can locate the United States on a world map or globe in two ways. One way is to find the United States in the northern \_\_\_ or northern half of the world. Another is to find it in the western half of the world.  
10. (A) hemisphere  
(B) section  
(C) position  
(D) location
